- Wire, Rod, Bar
- Strip, Sheet, Plate
- Pins, Stylets, Needles
- Formed Wire Components
- Fabricated Tubular Components
- Biopsy & Radiographic Markers

MEDICAL GRADE MATERIALS

- Stainless Steel
- MP35N®
- Cobalt Chrome Alloys
- Precious Metals
- Nitinol
- Titanium
- Tantalum & Niobium
- Tungsten & Molybdenum
- Exotic & Challenging Metals

INDUSTRIES SERVED

- Medical Device Manufacturing
- Metals Manufacturing
- Metals Distribution
- Petroleum Exploration
- Academic Research & Development
- Aerospace
- Electronics
- Jewelry

Sourcing engineered raw materials to the medical device industry since 1962

Origin of the Name

Xylem is a botanical term describing a part of the vascular network in plants which delivers water and minerals from the root structure to the leaves. This network is multi-functional, providing nutrients for new growth, as well as structural support for existing plant tissue. In this context, the activities of Xylem Company symbolize Xylem tissue; we provide basic raw materials and structural support throughout the network of the medical device industry.
