

Xylem Company

Providing Metals to the Medical Device Industry
since 1962

WHO WE ARE

Since 1962, Xylem Company has specialized in the development and strategic sourcing of engineered metal raw materials and components for the medical device industry. We have made it our mission to match the demand of the industry with the capabilities of the manufacturing companies we represent.

Greater value is often achieved by combining materials and services. When the commercial or technical complexity extends beyond our principals, Xylem Company offers industry-leading solutions involving value-added distribution, component development, assembly, and other service-oriented transactions.
